

MIXED GRASSLAND ECOZONE

Help bring butterflies home to your garden

Native wildflowers are adapted to local climate and soils and require less care and watering once established. They provide sugar-filled nectar and protein-rich pollen for beneficial insects like local butterflies and wild bees. This regional native plant list includes wildflowers for the *Mixed Grassland* ecozone, which includes: **Medicine Hat AB, Leader AB, Swift Current SK, Assiniboia SK, Maple Creek, Shaunavon SK and Kindersley SK**. Always try to find local sources for native plants.

Common Yarrow

Showy Milkweed

Smooth Fleabane

Wild Bergamot

Prairie Goldenrod

Common Name	Botanical Name	Height	Flower Colour	Flower Season	Sun	Soil	Pollinators	Butterfly Host Plant
